I guess that's one of the reasons why Minecraft is so popular; it's simple and easy to understand, because of things like having to collect resources to build things. If you see a home on something like Roblox and Minecraft, it's probably built out of random things a lot of people gave you; whereas in Minecraft there are actual blocks which you can use in the game itself.

In July 2021, ROBLOX claimed that after the introduction of the new games and improved networking system "We will be supporting many more platforms than before." I really like Roblox because I get to make friends with other users on the Internet that are my age and play games with me. Another thing I like about it is that you can play different games and see which ones you like, so it's very fun to me. I also think that the game has helped me develop a lot of social skills because you can talk to your friends using voice chat or text chat. You can tell them how you're feeling, what's wrong, etc. It's a game where there are a lot of different people from all around the world and they all have their own story. Another reason why I love the game is that you can really make new friends and you can play with them offline.
