ROBLOX has also been criticised for lacking any kind of quality assurance for its games. There have been many issues with the quality of some games and many users have complained that their game descriptions are not accurate. The site is also frustratingly inconsistent in the manner it deals with things like this, often banning users who complain about bugs and glitches within their games but not actually banning anyone who commits an illegal act, such as copying someone else's game and selling it without permission.

They say content is king, and this statement could not be more accurate for Roblox. Why? Because on Roblox, players are able to make their own games within the game itself! These games are called "games" or "sims," and they can be accessed from a GUI called "The Catalog." There are tons of free games that players have created and uploaded for others to play. In order to play these games, you have to purchase them using free robux. You can also make your own game and make it either free for

others to play or charge for everyone else to play.

There have been several stories of people being scammed by users who receive no response when attempting to use a built-in feature that allows the user to block other users from messaging them.[71]
